Margarita Ilieva, Zbigniew Podgórski, Zygmunt Babiński <i>Development and Activity of the Institute of Geography, Kazimierz Wielki University in 1995-2016</i>	7
Edmund Tomaszewski <i>Seasonal concentration time of hydrological drought in Poland</i>	17
Sergey R. Chalov <i>Hydroclimatic development and anthropogenic impact on sediment loads in the Selenga catchment</i>	27
Marian S. Varbanov, Kristina M. Gartsyanova <i>Index assessment of the water quality – a case study of Bulgarian rivers</i>	41
Aufar M. Gareev <i>Characteristics of the slope and river runoff transformation and its influence on the activation of erosion and fluvial processes – a case study of small river basins in the Southern Urals and the Cis-Urals</i>	51
Nadezhda Mikhailova <i>Effects of width channel increase in the formation and evolution of sandbars (riffles)</i>	57
Alexey V. Chernov, O.V. Korableva, Alexandr S. Zavadsky <i>River channel deformations under different phases of hydrological regime and various energy floods</i>	67
Leonid A. Turykin, Konstantin M. Berkovich, Leonora V. Zlotina <i>The developed (graded) longitudinal profile simulation in the river section (a case study of the Upper Oka River)</i>	75
Mikhail. A. Kolosov, Natalia V. Selezneva <i>Regulation of river water regime by detention dams</i>	83
Viktor A. Volosukhin, Mikhail M. Mordvintsev <i>Lockage of the Lower Don: history, problems, purposes</i>	89
Marcin Hojan, Mirosław Rurek <i>Particle-size distribution of channel bars of the lower Vistula between Bobrowniki and Bydgoszcz-Fordon</i>	97
Marcin Gorączko <i>E70 waterway as a stimulator of tourism development in Nakło County – status quo and prospects</i>	105

Karol Mieczkin (Karl R. Mechkin)	
<i>Construction variants for a Bydgoszcz bypass canal along the route of International Waterway E70</i>	115
Barbara Osóch	
<i>Diversity of social and environmental problems in the Szczecin Lagoon region</i>	123
Hubert Rabant	
<i>Conditions for the inland water transport development in Kujawy-Pomerania Province in the light of planning and strategic documents</i>	133

Preface

Geography and Tourism is an interdisciplinary scientific journal aimed at promoting the results of theoretical and empirical research in geographical sciences and tourism. It is a pleasure to announce that in 2015 the journal scored 6 points on List B of the Ministry of Sciences and Higher education.

Following the decision of the Minister of Science and Higher Education, the journal has been granted funds for pursuing activities aimed at promoting science: reviews of articles by foreign scholars/experts and translation of submitted articles into English in 2017/2018. The tasks are financed under the agreement no. 777/P-DUN/2017.

Current issue of the journal includes papers focused on physical geography, with emphasis on hydrology, geomorphology and water management. The first article, opening the volume, sums up the twenty-year history of development of the Geography Institute at Kazimierz Wielki University in Bydgoszcz. We sincerely thank the authors and reviewers for their contribution to the development of the journal.

We encourage you to submit research results for the next issues of Geography and Tourism. Instruction for authors is provided on the journal webpage www.geography.and.tourism.ukw.edu.pl.
