Acknowledgments 13
Introduction 15

Chapter 1
Systems theory in contemporary philosophy: what constitutes a system? 23
1.1 On the 'systemic' approach 23
1.2 Bunge and Bocheński: basic premises concerning a system 28
1.3 Laszlo's theory of natural and cognitive systems 34
1.4 Conclusion 48

Chapter 2
On the antinomy between structure and change: a historical perspective 51
2.1 What does structuralism impose on language? 51
2.2 Homogeneity of language system 56
2.3 Homogeneity of language in Paul's theory 60
2.4 Saussure's conception of language system 62
2.5 The structure-change antinomy and homogeneity of language system in post-Saussurean linguistics 67
2.6 Heterogeneity of language system: a resolution of the structure-change antinomy 75
2.7 Conclusion 92

Chapter 3
The mechanism of sound change and the regularity controversy 95
3.1 On the importance of sound change 95
3.2 Paul's views on sound change 99

3.3 The regularity hypothesis in the twentieth-century linguistics 111
3.4 The diffusionist model of sound change 115
3.5 The regularity hypothesis and evidence from dialect geography 126
3.6 Evidence from changes in progress 136
3.7 Sound change in homonymic words 139
3.8 Evidence for lexical diffusion 143
3.9 Labov's proposal for resolution of the regularity controversy 146
3.10 Conclusion 150

Chapter 4
System, structure and function: on coordinated sound shifts and the functional view on language 153
4.1 Language structure and function: general remarks 153
4.2 Language structure and function in Martinet's theory 155
4.3 On chain shifts: evidence from historical and current sound changes 163
4.3.1 General principles and patterns of vowel shifts 163
4.3.2 The Great Vowel Shift (Pattern I): on the importance of peripherality factor in vowel shifts 167
4.3.3 Contemporary vowel shifts (Patterns II and III) 173
4.4 Chain shifts and maintaining the phonological structure: mergers and near-mergers 178
4.5 Functionalism and Labov's theory of language change: concluding remarks 181

Chapter 5
On the system's coherence and interdependence of elements: evidence from 'unsystematic' languages 187
5.1 Interdependence of language subsystems contrasted with the autonomous approach 187

5.2 The Kupwar case: syntactic convergence of three languages 192
5.3 The case of language 'mixing' in Mbugu 198
5.4 Pidgins and creoles: the problem of language origin and expansion 200
5.5 Conclusion 213

Chapter 6
How languages evolve in time 217
6.1 Is there a 'drift' in language? 217
6.2 Can language change be teleologically motivated? 226
6.3 On the cognitive conditioning of language change 235
6.4 The notion of economy in language 241
6.5 Redundancy, variation and the actuation of change 245

Chapter 7
Systems theory and the ontology of language: concluding remarks 251
